Dear 6sense Team,

Looking for a web developer who knows React, Redux, and Ruby on Rails and is equally passionate about elegant and robust CSS? I'd love to help.

I'm Matt, a frontend engineer with deep interest in proficient frontend design along with strong fundamental programming skills in JavaScript and Ruby.

Why does 6sense appeal to me? I would love to work at a company that values and respects engineering and design on a massive scale. My personal interest is becoming an expert CSS and frontend developer, and I enjoyed reading about the kind of disruptive technologies being developed at 6sense.

I want to thank you for taking the time to read my application, and I look forward to hearing back.

Sincerely,

Matt L. Wong
