Dear Squarespace Team,

Looking for a web developer who knows React, Redux, and Rails and is equally passionate about elegant, robust CSS? I'd love to help.

I'm Matt, a frontend engineer with deep interest in proficient frontend design along with strong fundamental programming skills in JavaScript and Ruby.

Why does Squarespace appeal to me? I once used Squarespace as the front-end of my photography business, and I was impressed by all the robust features offered by the service. I'm impressed by how well Squarespace tailors its design to each individual customer, at a massive scale, and it would be an amazing experience to contribute to this movement.

I chose to apply to Squarespace because I want to work at a company that values and respects engineering aesthetics on a large scale. So many people all around the world benefit from the engineering and design at Squarespace, and it would be amazing to help contribute to this movement. My professional interest is becoming the best frontend developer, with an emphasis on advanced CSS principles.

I want to thank you for taking the time to read my application, and I look forward to hearing back.

Sincerely,

Matt L. Wong
